

KICKSTARTING CAPITALISM

FINDING A CALLING

IN A CLEAN ENERGY FUTURE

A CONVERSATION WITH SUSTAINABILITY EXPERT HUNTER LOVINS

Broken economy, cooking planet. Six years after the financial meltdown, many college graduates still can't find jobs—let alone meaningful work. At the same time, global warming continues to drive record breaking temperatures, unprecedented droughts, and intensified storms. Sustainable Business Leader Hunter Lovins, author of *Natural Capitalism* and *The Way Out*, and Eban Goodstein, Director of Graduate Programs in Sustainability at Bard College, will focus on how rewiring the world with clean energy can create tens of millions of jobs, and empower a rising generation to save the future.
