

Guest Speakers

1. Invite guest speakers to join your class, per usual.
2. Either meet (in person or online) with the guest speaker ahead of time to instruct in how to use the online tool, or physically join the guest speaker so that they can present while you handle the technology.

Benefits: You can still use the expert resources to enrich your students' experiences; you can invite experts from other locations to share with your class

Constraints: Comfort level with technology varies, so having a backup plan in case the guest is unable to connect will be useful.
