Office Hours: By Appointment

## Course Description

This multidisciplinary course explores the structural evolution of the United States' role in the world and the institutions shaping elite policy-making. Through an interactive approach, students will be able to contextualize contemporary American foreign policy challenges from their geographic, material, and ideational roots. Furthermore, course activities and assignments are tailored to assist students in becoming foreign policy practitioners fully capable of applying national security decision theories. The curriculum threads together historical cases, international relations scholarship, and security studies in order to provide a holistic understanding of all the constituent parts influencing America's external posture. How did a nation once known for its relatively isolationist disposition become a global superpower and key enforcer of the liberal international order? What are the unique attributes of American-style foreign policy that have remained consistent across presidential administrations since the end of World War II? A critical appraisal of topics such as hard and soft power, alliances, globalization and multilateralism, bureaucratic politics, and the rise of the military industrial complex offers students the necessary tools to answer these core questions. The complementary emphasis on professional development will allow participants to garner practical skills through simulations, seminar debates, and presentations.
